

MANAGING CHANGE. DEVELOPING PEOPLE. IMPROVING PROCESSES.

At GM Growth Consulting we take a holistic approach to managing change, developing people and improving processes — we work with people *and* processes.

We recognise that simply giving people better skills and knowledge may not lead to maximum benefit if those people return to work environments and processes that are 'broken' or less than optimal.

So, like today's best business leaders, we will partner with your people at all levels to uncover real needs, encourage innovation, manage change, eliminate waste, and explore and implement new behaviours and skills.

KEY SERVICES

GMGC change management, people development and process improvement initiatives seek to allow individuals to learn and apply new skills and constructive work style behaviours to enhance their own individual and overall team performance.

Key services:

- Change management
- Training and facilitating
- Process improvement
- Effective leadership styles and coaching workshops.

“Let us show you how we can help. We will listen. Find realistic actionable solutions. Partner with your people to implement and deliver positive results.” — Glen McKernan, Director
